

TECHNICAL DATA SHEET

ULTRASTAB – DBLP (Dibasic Lead Phosphite)

Coral Petroproducts manufacture a complete line of lead stabilizers, which are recognized As a most versatile of all stabilizers said to process rigid PVC pipes, fittings & Profiles.

ULTRASTAB-DBLP is excellent stabilizer for rigid and flexible PVC where good heat stability is required. It is also recommended for cable sheathing and cable insulation due to outstanding electrical properties. It shall be used in consumption with DBLP as per the application.

Sr.No.	PARAMETERS	Specification	Typical Value
1	Appearance	Creamy White Powder	Creamy White Powder
2	Metalic Content as % of PbO	>87.50	87.75
3	Specific Gravity	6.3 – 6.5	6.4
4	Moisture Content, 105 °C, at 1 hrs. % Max	0.25 Max.	0.15
6	Mesh size 200 Pass Through	100 % Pass	100 % Pass

Application : PVC Compound, Rigid PVC pipes & cables, PVC profiles & Flooring, PVC Footwear, Master Batches.

Packing : The materials shall be packed in 25 kgs.bags. The bags will be properly sealed to ensure prevention of moisture ingress. On each bag our name, grade, batch., date of manufacture along with gross weight and net weight will be clearly mentioned.

Guarantee : Each consignment supplied shall be accompanied by amaterial safety data sheet and attest certificate certifying the conformity of the material to the purchasers material specification
